### 5. Attempt any TWO of the following :

- a) Draw ER diagram for Hospital management system.
  (Use Entity-Doctor, Patient, Hospital and Medical Record).
  Show Primary Key, and Foreign Key.
- b) Write SQL query for the following consider table.

Emp(emp\_id, dept, emp\_name, salary, designation, joining\_date, DOB, city)

- i) List employees with having alphabate 'A' as second letter in their name.
- ii) Set salary of all 'project leaders' to 50,000.
- iii) Display average salary of all employees.
- iv) Display employee-Id of employees who live in city 'Pune' or 'Nagpur'.
- v) Display employee name, salary and city from 'HR' department who having salary greater than 70,000.
- vi) Display details of all employee who's salary same as that of salary of 'Shashank'.
- c) Consider schema of book table as Book\_Master (book\_id, book\_name, author, no\_of\_copies, price) Write down the SQL queries for the following.
  - i) Write a query to create table Book\_Master table.
  - ii) Write a command to create composite index on Book\_Master table.
  - iii) Write a command to drop above index.
  - iv) Display book name and author in decreasing order of price.
  - v) Display all books whose number of copies are greater than 50.
  - vi) Create synonym for relation Book\_Master as Book\_Information.

## 6. Attempt any <u>TWO</u> of the following : 12

- a) Write a PL/SQL program to print sum of n odd numbers using for loop.
- b) Write a command to create table Customer (Custo\_id, Cust\_name, address, Contact\_no, City). And write down the queries for the following:
  - i) Insert one row into table.
  - ii) Save the data.
  - iii) Insert Second row into the table.
  - iv) Create save point S1.
  - v) Insert one row into the table.
- c) Describe database privileges. Write down the command for granting and revoking privileges on database object to users.
